

Hot Knife for Cutting and Sealing Nylon Sash Cord

‘Cuts by melting through the rope and sealing the core and cover together’

This industrial hot knife rope cutter is a hand operated tool that will cut and seal end on all synthetic cords and ropes. It takes a mere 6-8 seconds to heat up to approx 600°C it will melt the rope and seal the ends. Heat may be controlled by switching tool on and off.

This tool will save you both time and money compared to mechanical cutting, your ropes will last longer, the cutting process is quicker etc.

Recommended for short term operation only.

Knife comes complete with a blade for cutting and sealing rope.

Replacement blades are available to order.
